SUMMARY

During 1978, one thousand thirty-two Texas towns and cities, as well as their environs and many rural areas, received natural gas service from 58 investor-owned and 83 municipal distribution systems. There were about 2.84 million residential customers, including 356,000 served by municipal operations not under rate-making jurisdiction of this Commission. The eight largest distribution systems, six private and two municipal, provided 94.5 percent of the domestic gas service in the state. There were approximately 247,700 small commercial and industrial customers, 6,900 large commercial and industrial customers and 7,500 customers reported as other types of customers.

Statewide, average residential consumption for 1978 was 87.1 Mcf per customer, compared to 83.6 Mcf for 1977. Total annual degree day deficiency for 1978, as recorded by the National Weather Service, reflects that heating seasons within the year were 23.6 percent colder then normal. 1978 was 24.4 percent colder than 1977 while the average residential customer consumed only 4.19 percent more gas during 1978.

Residential customers of companies under the jurisdiction of this Commission paid an average of $2.68 per Mcf for natural gas consumed in 1978, compared with $2.43 per Mcf the year before.

For the year 1978 small commercial and industrial customers of distribution companies paid an average of $2.44 per Mcf, as against $2.11 in 1977. Large commercial and industrial customers paid an average of $2.11 in 1978 and $1.85 in 1977.

Total natural gas sales in Texas to all customer classes by reporting distribution companies were 761.6 billion cubic feet in 1978, an increase of 3.06 percent from the previous year.

Direct industrial sales by pipelines in 1978 were 2.48 trillion cubic feet, an increase of 3.38 percent over the previous year. Pipeline revenue from industrial sales averaged $1.58 per Mcf in 1978, up from $1.46 for 1977.

Privately owned distribution systems were unable to account for 27.75 million Mcf of gas purchased in 1978 for resale, or 3.70 percent. Average value of this unaccounted for gas was $1.84 per Mcf. Municipal systems had 3.41 million Mcf, or 4.06 percent of all gas purchased, unaccounted for in 1978, as compared to 6.7 percent in 1977. The average value of this gas was $1.53 per Mcf.

Miles of pipeline in operation in Texas totaled 67,259 at the end of 1978 of which 79 percent is operated by twenty companies.

Fixed investment for distribution facilities in Texas was $964,059,837 at the end of 1978, an increase of 5.36 percent over

1977. Fixed investment for transmission facilities in Texas was $2,429,053,383, an increase of 6.98 percent over 1977.

Gross receipts tax collections in 1978 by the Gas Utilities Division, one-fourth of one percent on gross income from business within the state, amounted to $14,720,798.

Annual reports for 1978 were filed with the Gas Utilities Division by 244 companies.

*Degree days measure the deviation from normal temperature by accumulating the difference between 65°F and the daily mean temperature. A mean temperature of 60° for one day would be a five degree day deficiency. A greater degree day deficiency than normal indicates colder weather. Less degree day deficiency than normal indicates warmer weather. These figures are on a calendar year basis. Colder periods in each heating season may fall either before or after year end.
